## Letter from Editor-in-Chief

On behalf of members in the International Editorial Board, I am pleased to give our warmest greetings and welcome to the authors of the published articles and readers for your continuous support in the International Transaction Journal of Engineering, Management, & Applied Sciences & Technologies (ITJEMAST) as one of your referenced journals. I also would like to say 'thank you' to Associate Professor Dr. Boonsap Witchayangkoon as well as members of the Editorial Board who gives me a trust to act as the journal's Editor-in-Chief.

*Many published  
articles have  
already been cited  
by authors who  
have published  
their articles in  
renowned journals  
recognised under  
SCOPUS and ISI.*

ITJEMAST is a multidisciplinary academic journal which aims to become one of the primary journal references for research and practice on sustainability. The journal is not limited to topics on engineering, management, applied sciences and technologies, but also covers on multi- and trans-disciplinary research that integrates or affects multiple sustainability components which could be social, economic, and environmental. Many published articles have already been cited by authors who have published their articles in renowned journals recognised under SCOPUS and ISI. Through these publications and citations, we would like to develop networks with local and international institutions and organisations by disseminating knowledge on applied and theoretical developments supporting emerging sustainable oriented research and practice.

We hope ITJEMAST will continuously become a platform for sharing knowledge and research findings internationally and welcome the opportunity to reach out to the industry. It is our wish to come together for the long-term benefit of our future generations and while doing so, inspire others to support our cause. By this way, we really hope that ITJEMAST is able to move forward to become the champion as an academic reference in sustainable development. The opinions stated by each article are those of the authors. Its publication does not imply concurrence from the editorial board nor the publisher. We welcome any comments for improving ITJEMAST. We also have the pleasure to invite readers to submit their articles for considerations in ITJEMAST publication. All contents of the published articles were evaluated by prestigious reviewers to ensure that their high quality's contents are preserved. We are very pleased by the high quality of articles in ITJEMAST. We would like to express our appreciation to the authors who have contributed their articles in this journal.

Thank you.

Ahmad Sanusi Hassan, PhD

Associate Professor, School of Housing, Building and Planning,  
University of Science Malaysia (USM), Penang Malaysia
